Primary Skills

Delivery Management, Team Leadership, .NET, Web Development

Position

Project Manager / Product Owner

Summary

Results-oriented technical team manager and .NET developer with more than 10 years experience in IT.

Supervised a team of 18 engineers on a large production commercial project for a US-based customer for 8 years.

Specialized in management and web development with full project life cycle (SDLC) (analysis, designing, coding, testing and maintenance) and software methodologies (Agile, SOLID, TDD, DDD, etc.).

Took responsibility for major technical decisions on the project from hi-level solution design, selection of technologies and frameworks, to release control, daily code reviews and live issue resolutions.

During 4 last years interviewed more than 100 people for Minsk (and NYC dba) team for different positions: developers/dba/qa/pm.

Certified Scrum Master and Microsoft Certified Professional Developer with fluent English.

Great communication skills and experience presenting to CEO/CTO level executives.

Strong work ethic and passion to deliver end results.

Projects

2013–present Intetics
Delivery
Manager/Team Lead

Accelify LLC: AcceliTrack, Cheetah, IEP Plan 2.0

Responsible for all aspects of delivery on a platform of web based solutions for our New York City based customer Accelify LLC (www.accelify.com). System has been operating in production in 10 states of USA for 8 years since the project start with more than 50K business users (bringing early revenue of \$10M+), with an uptime of 99%.

AcceliTrack/Plan are SaaS distributed systems for tracking Medicaid services/students data. I was responsible for technical team management and all technical aspects of the product. In 2013 and 2016 worked on-site in customer's office for 2 months summary.

Primary Responsibilities: Acted as project enabler and solution architect for latest 'Cheetah' and Plan/IEP subsystems. Direct day-to-day communication with Product Owner and CEO. Scrum process setup, scope and backlog prioritizing, release planning. Technical work from high level architecture to low level devOps tasks. Management of two development streams including review, coaching and people hiring.

2012–2013 Intetics
Team Lead/Senior
Software Engineer

Accelify LLC: AcceliTrack, IEP Plan 2.0

Worked as a Team Lead and managed the technical effort for a major release to deliver systems for 4 new US states into production. Grew the team from 5 to 10 developers.

Primary Responsibilities: Direct communication with customer and stakeholders, estimation and planning. Requirements analysis, tasks assignment, release planning, iteration planning, candidates review. Migration from NHibernate criteria to query API, core application fixes. Implemented Continuous integration. Db design from updatable views to single base. Nhibernate migration to 3-4.x version with performance tweaks.

2011–2012 Intetics
Project Manager/Senior
Software Engineer

Accelify LLC: SST, Data Integration

SST is a web system for medical specialists in SEIS (www.seis.org) for storing/editing student information. Started this short-term side project with USA-based developer. Performed various management and development activities from planning to risk management.

On a data project designed integration of the main SQL database to SEIS System.

Primary Responsibilities: Stabilization of the project, team management: communication with the customer, tasks assignment, planning and delivering

product. Key developer and communication person. Migration to ASP MVC 3 and Razor view engine, MVVM implementation.

As a dba developer, I performed various tasks from creation and performance tuning to setup of the MS SQL Jobs/Linked servers.

2009–2011 Intetics
Software Engineer

Accelify LLC: AcceliPlan, AcceliTrack, AcceliSurvey

Acted as project enabler in a small start-up team including 2 developers and 1 qa.

Primary Responsibilities: Web application design and implementation (MVP, facades). Database structure creating, merging, normalizing. Direct communication with customer, estimation and planning.

2012–2012 Intetics
Senior Software
Engineer

Elitute

Elitute is web education system and marketplace that connects freelance tutors with students. This is a short-term side project where my main responsibilities were setup ORM layer and design core database functionality.

Primary Responsibilities: Project start, Fluent NHibernate configuration and mappings creation, localization support

2006–2009 Beldorcentr
Software Engineer

Web STP, Bridges PDA, Data Export Import Tools

Started as a .NET developer and successfully implemented 3 projects in transport area. ASP.NET intranet application for displaying road traffic statistics data and generating reports across with Windows Mobile product and sets of data export tools.

Education

Mathematician in Systems/Software Engineer
Belarusian State University, Minsk, Belarus
(2002-2007)
