Projects

2013–present Intetics

Accelify LLC: AcceliTrack, Cheetah, IEP Plan 2.0

Since 2013 I'm responsible for delivery on set of subsystems for the NYC based Accelify LLC Customer(http://www.accelify.com). System is live in 10 states of USA for 8 years since the project start with more than 50k business users (and revenue more than 10m$/y). Team size grown from 3 to 20 people since 2009.

AcceliTrack/Plan are SaaS distributed systems for tracking Medicaid services/students data.

I was responsible for technical team management and all technical aspects of the product. In 2013 and 2016 worked on-site in customer's office for 2 months summary.

All IT decisions were made by Minsk team and me as a lead.

Primary Responsibilities: Acted as project enabler and solution architect for latest 'Cheetah' and Plan/IEP subsystems. My responsibilities included direct communication with PO (on a daily basis) and CEO. Scrum process setup, scope and backlog prioritizing, release planning. Technical work from high level architecture to low level devops tasks. Consistent management of two development teams including review, coaching and people hiring.

Tools and Technologies: Jira, Smartsheet, Google Docs, MS VS2015, Dapper, Nhibernate 4.x Simple Injector, WEB API-MVC5, WebSockets(SignalR), RabbitMQ, Memcached, AngularJs, KendoUI.

Team Lead/Delivery manager/Solutions Architect

2011–2013 Intetics

Accelify LLC: AcceliTrack, IEP Plan 2.0

At that period product was delivered to 4 new states and clients, the team grown to 10 people.

Primary Responsibilities: Direct communication with customer and stakeholders, estimation and planning. Requirements analysis, tasks assignment, release planning, iteration planning, candidates review.

Migration from NHibernate criteria to query API, core application fixes, database design and development. Implementing Continuous integration.

Db design from updatable views to single base. Nhibernate migration to 3 version (after that to 4) performance tweaks and Future/Batch support, db performance tweaks.

Tools and Technologies: Jira, Smartsheet, Slack, MS VS2012, MS SMS, Cruise Control, ASP.NET 4.0, NHibernate 3-4, Fluent Nhibernate, .NET Framework 4.0, JQuery, LINQ, SVN, CastleFramework.

Senior Software Engineer/ Team Lead

2011–2012 Intetics

Accelify LLC: Student Success Team (SST) project
SST is a web system for medical specialists in SEIS California for storing/editing student information. Started this short-term side project with USA-based developer. Performed various management and development activities from planning to risk management.

Primary Responsibilities: Stabilization of the project, team management: communication with the customer, tasks assignment, planning and delivering product.
Key developer and communication person. Migration from ASP MVC 2 to 3, migration from jQuery templates to Razor view engine, IoC via Castle Windsor implementation, MVVM implementation.
Tools and Technologies: Jira, Smartsheet, SOLID principles, ASP MVC 2-3, MS VS2010, MS SMS, TFS, Entity Framework, .NET 3.5, LINQ, CastleFramework, jQuery, jQuery templates, log4Net.

Senior Software Engineer

2011–2012 Intetics

Accelify LLC: AcceliPlan, AcceliTrack Data Integration
Integration of the AcceliPlan MS SQL database to SEIS Education System.

Primary Responsibilities: As a key dba developer, I performed various tasks from creation and performance tune of the stored procedures to setup of the MS SQL Jobs/Linked servers.
Tools and Technologies: Jira, MS SQL Server 2008 R2, MS SQL Linked Servers, MS VS2010, MS SMS, Cruise Control, SVN

Senior Software Engineer

2012–2012 Intetics

Elitute
Elitute is web education system and marketplace that connects freelance tutors with students. This is a short-term side project where my main responsibilities were setup

ORM layer and design core database functionality. Team size 6 people.
